

ZEPHYR—ENHANCING YOUR BUSINESS BY MAKING EDI SIMPLE

POWERED BY BDO DIGITAL LABS

UNDERSTANDING EDI

Electronic Data Interchange (EDI) is when businesses electronically communicate information that was traditionally communicated on paper to help improve efficiency, reduce costs, and strengthen relationships between partners. It involves more than just the translation of data and sharing of information between partners. It's also about understanding supply chains and business systems and creating seamless integration. But EDI can be difficult to implement and complicated to manage.

HOW ZEPHYR WORKS

Zephyr managed services combines widely practiced technology, EDI experience, and unparalleled customer commitment to help make EDI easy to manage. Our team of professionals manage your EDI every step of the way while also providing the following:

- ▶ Help ensure success by handling all set-up, testing, and ongoing support of your EDI relationships
- ▶ Proactively monitor all transaction activity and provide alerts when action is required
- ▶ Process millions of transactions in a secure and timely manner
- ▶ Handle all communication methods (AS2, FTP, SFTP) and data formats (X12, EDIFACT, TXT, XML, etc.)

BENEFITS

- ▶ Cost-effective EDI transaction processing
- ▶ Rapid compliance with trading partner EDI deadlines
- ▶ Reliable performance with low cost of ownership
- ▶ Full-range EDI solutions that allow you to start small and evolve as needed
- ▶ Scalable performance for both large and small clients

WHY ZEPHYR?

Zephyr, a product available within our BDO Digital Labs suite of solutions, helps make the management of EDI simple. **With our solution, you get access to extensive support from industry professionals who are knowledgeable about EDI.**
